Pre Press

The Prepress Department processes input files received from customers and gets their approval on either hardcopy or softcopy proofs. These processed and approved files are used to make plates which act as the master copy for the copies reproduced.

We handle inputs supplied in a variety of industry standard formats on both Mac and PC platforms. The received files are checked for any issues with fonts, images, bleed, etc. and any corrections needed are carried out.

Our Prepress team is skilled in carrying out any colour-corrections / touch-ups / cut-outs required in the job. Apart from the industry-standard Photoshop, specialized software such as ColorTone / ICISS / HumanEyes 3D are
